- We are fast! – All stairlifts can often be fitted within just a few days of enquiry.
- Most staircases can be catered for either with a straight stairlift with carpentry work or a purpose built curved stairlift – see our website for some examples.
- Call us for FREE advice or a no-obligation survey and quotation.

P.S. We also buy unwanted stairlifts!

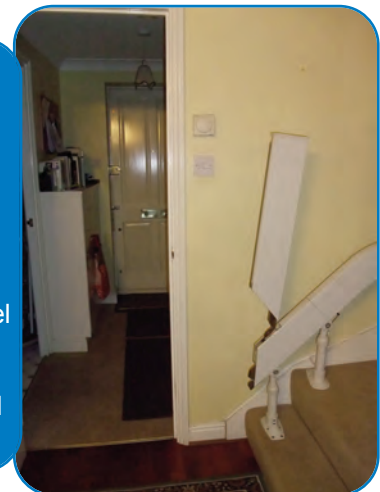

The stairlift folds neatly away when not in use, allowing safe and easy access for others when using the stairs

For more complicated staircases, a custom built curved stairlift that can be rented or purchased, is the perfect option.

Our curved tracked stairlifts will fit most staircases, with a motorized hinge being an ideal solution when the track covers a doorway. All our stairlifts swivel at the top of the stairs, this provides safe transfer on and off the stairlift.

Hinged tracks are used when a stairlift would cover a door way or present a tripping hazard.

When not in use, the stairlift is parked on the stairs with the hinge folded up. When required, the hinge is folded down and the stairlift brought down to floor level using a remote control, allowing safe transfer on and off the stairlift.

Curved tracked stairlifts are made to measure for your staircase. Below are some examples of what can be done
